

Define your problem statement

Every individual in this world has their own style of writing, so handwriting recognition is a most sought after research field. As computers are becoming more and more smarter these days and help reduce the work of humans, they are capable of identifying and understanding handwritten digits. Hence, there comes a need for handwritten digit recognition in many real-time applications.

5 minutes

- Stay in topic.
- Encourage wild ideas.
- Defer judgment.
- Listen to others.
- Go for volume.
- If possible, be visual.

Brainstorm

Write down any ideas that come to mind that address your problem statement

12 minutes

TIP You can select a sticky note and hit the pencil (switch to sketch) icon to start drawing!

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

⌚ 30 minutes

TIP
Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mind.

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.
